

FEROZ NAGURU

Madanapalle, Andhra Pradesh | +91-8096729581 | fferoz112233@gmail.com
github.com/Feroz723 | linkedin.com/feroz-web-developer

PROFESSIONAL SUMMARY

Motivated AI enthusiast and self-taught developer with hands-on experience building AI-powered automation systems, CRM platforms, and content generation tools. Proven ability to integrate LLMs into production applications. Strong foundation in Python, React, and PostgreSQL with excellent problem-solving skills. Passionate about leveraging AI for social impact and making technology accessible to underprivileged communities.

EDUCATION

Bachelor of Technology in Computer Science and Engineering (Data Science) 2022–2026
Madanapalle Institute of Technology and Science CGPA: 8.1/10

TECHNICAL SKILLS

Languages Python, SQL
AI & ML Machine Learning, NLP, Supervised/Unsupervised Learning
Data Science Data Analysis, Model Evaluation, EDA
Web Flask, Next.js 14, React, Tailwind CSS, REST APIs
Databases SQLite, PostgreSQL, MySQL
Tools Git, GitHub Actions, Vercel, Docker, n8n

PROJECTS

AI-Driven CRM Automation Platform 2025–2026

- Built autonomous lead generation and CRM system using Llama 3.1 and Google Gemini for AI-powered intent analysis, lead scoring (0–100 scale), and personalized outreach generation.
- Implemented event-driven serverless architecture with Next.js API Routes, PostgreSQL, Prisma ORM, and Cloudflare Workers for global edge distribution.
- Created interactive Kanban pipeline dashboard with drag-and-drop functionality, optimistic UI updates, and real-time WebSocket synchronization.
- Integrated HubSpot CRM sync and multi-source lead ingestion (Facebook Ads, Google Forms) with complete audit logging and multi-tenancy logic.
- Tech: Next.js 14, React, PostgreSQL, Groq API, Vercel, Cloudflare*

AI Solopreneur Bot (Autonomous Content Platform) 2024–2025

- Developed fully autonomous AI agent managing entire content marketing workflow from trend discovery to social media posting with \$0/month operational cost.
- Implemented multi-source trend discovery from Reddit, Hacker News, Google, and GitHub with engagement-based ranking and niche categorization.
- Built content factory with context-aware AI prompts generating viral-style tweets, threads, and soft-sell CTAs with automated 3× daily posting schedule.
- Tech: Python, SQLite, Ollama/OpenAI, GitHub Actions, Twitter API*

Personal Blog Automation System 2024–2025

- Built semi-automated blogging system for SEO-optimized consumer gadget content with keyword discovery pipeline, classification engine, and priority scoring.
- Developed draft generation module with SERP analysis and LLM integration producing structured Markdown articles with affiliate link management.
- Integrated WordPress REST API for automated publishing with affiliate link injection, post-indexing, and complete audit trail in SQLite databases.
- Tech: Python, Flask, SQLite, WordPress API, Jinja2 Templates, YAML*

KEY ACHIEVEMENTS

- Designed 3+ production-ready AI applications demonstrating full-stack development from database design to cloud deployment.
- Integrated multiple LLM providers (OpenAI, Gemini, Llama) implementing cost-optimized AI workflows and serverless architectures.
- Built autonomous systems with event-driven architectures reducing operational costs to zero through strategic API usage.

CERTIFICATIONS

Google Data Analytics (Coursera) | AWS Cloud Practitioner (Gold – 74%) | Full-Stack Web Development
React.js Advanced Concepts | Docker Fundamentals – Simplilearn
